Press Note

Health of Live-stock in Mysore State during June 1952.

In their order of severity, outbreaks of Rinderpest, Blackquarter, Hæmorrahagic-septicæmia, Anthrax, Ranikhet, Sheep-pox, Foot and Mouth, Contagious-goat Pleuro-pneumonia and Rabies were encountered in the State during June 1952. Altogether 214 villages were reported to have been affected by one or the other of the several contagious and infectious diseases as against 230 villages during the previous month. The number of outbreaks was highest in Bangalore, Shimoga and Mandya Districts, while Hassan, Chitaldrug and Chikmagalur Districts were least affected. These diseases accounted for 1,169 attacks, of which 669 succumbed. The departmental staff conducted 29,596 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth diseases. In the absence of a reliable method of vaccinatory intervention other prophylactic measures were adopted against Foot and Mouth disease.

Five outbreaks of Rinderpest were registered in Challakere and Pavagada Taluks accounting for 56 attacks among cattle, of which 28 succumbed. Prompt measures

of control were undertaken by the department to check its spread and 2,075 cattle in the infected villages and 1,578 cattle in 7 neighbouring villages were protected against this disease. The disease appears to be well under control at the end of the month under report.

Diseases caused by internal parasites were reported from 120 villages accounting for 109 deaths, as against 135 villages accounting for 80 deaths during the previous month. The special staff attached to the parasitic disease control units of the department dosed 8,421 animals, as against 12,603 animals during the previous month.
